SUMMARY: Seeking a front-end developer position, armed with a strong background in the liberal arts. Completed a MERN full-stack development certificate through the University of Minnesota, with newly minted skills in HTML, CSS, JavaScript, the MERN framework, and responsive web design. Very much looking forward to getting started in this industry and continuing to learn every step of the way!

SKILLS:

- **Front-end:** HTML5, CSS, JavaScript, React.js.
- **Middleware:** ExpressJS.
- **Back-end:** Node.js, MySQL, MongoDB.
- **Libraries:** Bootstrap, jQuery, ES6.

PROJECTS: Fantasy Football Database | <https://jacobrosenbaum.github.io/FantasyFootball/>

- Worked with a team to create a central, streamlined location that instantly displays players projected to accrue the most points by position. Also, features a player search, and NFL schedule display by week.
- Designed the layout and style with Bootstrap. Performed legwork for researching and gaining access to the API for NFL schedule information.
- Utilized Bootstrap and CSS for design, and JavaScript for AJAX call to API for NFL schedule.

Weather Dashboard | https://kbetlach.github.io/weather_dashboard/

- Utilized the OpenWeather API to provide users with current weather conditions, and a five day forecast for any searched city.
- Worked with local storage to save user's searches into their client, and upon page reload all previously searched cities are generated as buttons for easy searching.
- Utilized Bootstrap and CSS for design, and JavaScript and jQuery for API calls and page behavior.

Eat-Da-Burger! | <http://eat-da-burger-kb.herokuapp.com/>

- Full stack application that utilizes a MySQL database to store user inputs.
- Handlebars.js utilized to display ordered burgers on left side of screen, and once the devoured button is clicked, moves burgers to right side of the screen.
- File structure created in the MVC framework with a custom ORM.

EMPLOYMENT: Recon & Store Clerk: Mississippi Market | St. Paul, MN (09/19 - Present)

- Count cash in register tills from the previous day's business while simultaneously preparing them for the current day.
- Prepare the cash and check deposit for transport to the bank.
- Consolidate all necessary paperwork from register tills to go to the Finance department.
- Log all co-op membership memos and contracts in the Catapult system.
- Aid the Grocery and Produce departments as needed once recon work is complete.

Warehouse Associate & Inventory Coordinator: Asmodee NA | Roseville, MN

(09/16 – 09/19)

- Used Acumen, Beanstalk, and Filemaker to accurately track products across four warehouses in Roseville, Lino Lakes, and Atlanta, GA and completed stock transfers.
- Worked with people across multiple departments including Sales, Production, Marketing and Licensing to ensure the inventory they needed was in the right place at the right time.
- Ran the year-end physical inventory across all warehouses accurately and efficiently.
- Coordinated with the Accounting department to make sure inventory adjustments were made regularly in Acumen so stock remained as accurate as possible.

Field Technician: Highway 101 Burial Recovery | Minnetonka, MN (May '15-Sep. '16)

- Assisted in the recovery of human remains and artifacts through screening the back dirt pile left behind by construction.
- Worked closely with members of the Dakota community and followed their guidance on how to best proceed with the recovery effort.
- Reconstructed the impacted burial mounds according to maps from the 18th century.
- Performed shovel skimming and excavations to define impacted perimeters on the project site.

EDUCATION: **MERN Full-Stack Web Development Certificate**
University of Minnesota Coding Bootcamp | St. Paul, MN

Bachelor of Arts, Anthropology and Religion.
Hamline University | St. Paul, MN
